Merely said, the chapter 1 introduction neo is universally compatible with any devices to read representations of Victorian women pay special attention to the use of costume and clothes, revealing the tensions between diverse theoretical interventions and generic (often market-oriented) demands. The author elucidates the push and pull between postcolonial critique and nostalgic, often Orientalist spectacle; between feminist textual interventions and postfeminist media images. Furthermore, this book examines neo-Victorianism’s relationship with postfeminist media culture and offers an analysis of the politics behind onscreen treatment of Victorian gender roles, family structures, sexuality, and colonial space.

Electrochromic Smart Materials-Jian Wei Xu 2019-01-04 Electrochromic devices have a wide range of applications, including displays, self-dimming mirrors for automobiles, electrochromic e-skins, textiles, and smart windows for energy-efficient buildings. This title covers major topics related to the phenomenon of electrochromism, highlighting a broad range of existing and potential applications of electrochromic materials and devices. Providing a comprehensive overview of the field, it will be of interest to postgraduate students and researchers in both academia and industry interested in smart design, materials science and engineering.

Neo-Confederacy-Euan Hague 2009-09-15 A century and a half after the conclusion of the Civil War, the legacy of the Confederate States of America continues to influence national politics in profound ways. Drawing on magazines such as Southern Partisan and publications from the secessionist organization League of the South, as well as DixieNet and additional newsletters and websites, Neo-Confederacy probes the veneer of this movement to reveal goals far more extensive than a mere celebration of ancestry. Incorporating groundbreaking essays on the Neo-Confederacy movement, this eye-opening work encompasses such topics as literature and music; the ethnic and cultural claims of white, Anglo-Celtic southerners; gender and sexuality; the origins and development of the movement and its tenets; and ultimately its nationalization into a far-reaching factor in reactionary conservative politics. The first book-length study of this powerful sociological phenomenon, Neo-Confederacy raises crucial questions about the meaning of an ideology that, founded on notions of white supremacy, has made curiously strong inroads throughout the realms of sexist, homophobic, anti-immigrant, and often “orthodox” Christian populations that would otherwise have no affiliation with the regionality or heritage traditionally associated with Confederate history.

Politics and Society in Western Europe-Jan-Erik Lane 1999-02-23 Politics and Society in Western Europe is a comprehensive introduction for students of West European politics and of comparative politics. This new edition has been extensively revised and updated to meet with the new needs of undergraduate students as they come to terms with a changing social and political landscape in Europe. This textbook provides a full analysis of the political systems of 18 Western European countries, their political parties, elections, and party systems, as well as the structures of government at local, regional, national and European Union levels. Throughout the book, key theoretical ideas are accessibly introduced and examined against the very latest empirical data on civil society, the economy, and political parties.

Neo-Victorian Cannibalism-Tammy Lai-Ming Ho 2019-02-04 This Pivot examines a body of contemporary neo-Victorian novels whose uneasy relationship with the past can be theorised in terms of aggressive eating, including cannibalism. Not only is the imagery of eating repeatedly used by critics to comprehend neo-Victorian literature, the theme of cannibalism itself also appears overtly or implicitly in a number of the novels and their Victorian prototypes, thereby mirroring the cannibalistic relationship between the contemporary and the Victorian. Tammy Lai-Ming Ho argues that aggressive eating or cannibalism can be seen as a pathological and defining characteristic of neo-Victorian fiction, demonstrating how cannibalism provides a framework for understanding the genre’s origin, its conflicted, ambivalent and violent relationship with its Victorian predecessors and the grotesque and gothic effects that it generates in its fiction.

Neo-Victorianism on Screen-Antonija Primorac 2017-11-17 This book broadens the scope of inquiry of neo-Victorian studies by focusing primarily on screen adaptations and appropriations of Victorian literature and culture. More specifically, this monograph spotlights the overlapping yet often conflicting drives at work in representations of Victorian heroines in contemporary film and TV. Primorac’s close analyses of screen

Dao Companion to Xuanxue (Neo-Daoism)-David Chai 2020-09-29 This comprehensive volume surveys an important but neglected period of Chinese intellectual history: Xuanxue (Neo-Daoism). It provides a holistic approach to the philosophical and religious traits of this movement via the concepts of non-being, being, and oneness. Thinkers and texts on the periphery of Xuanxue are also examined to show readers that Xuanxue did not arise in a vacuum but is the result of a long and continuous evolution of ideas from pre-Qin Daoism. The 25 chapters of this work survey the major philosophical figures and arguments of Xuanxue, a movement from the Wei-Jin dynastic period (220-420 CE) of early-medieval China. It also examines texts and figures from the late-Han dynasty whose influence on Xuanxue has yet to be made explicitly clear. In order to fully capture the multifaceted nature of this movement, the contributors brilliantly highlight its more sociopolitically-oriented characteristics. Overall, this volume presents an unrivalled picture of this exciting period. It details a portrait of intellectual and cultural vitality that rivals, if not surpasses, what was achieved during the Warring States period. Readers of the Yijing, Daojiaojing, and Zhuangzi will feel right at home with the themes and arguments presented herein, while students and those coming to Xuanxue for the first time will acquire a wealth of knowledge.

Neo-Liberal Ideology: History, Concepts and Policies-Rachel S. Turner 2008-02-07 Neo-liberalism has been one of the most influential ideologies since the Second World War. This book provides an original account of its intellectual foundations, development and conceptual configuration as an ideology. Newly available in paperback, this book presents a comparative study of the development and the nature of neo-liberal ideas in the national contexts of Germany, Britain and the United States since the twentieth century, addressing the following questions: * What are neo-liberalism’s intellectual origins? * What influence did neo-liberalism have on public policy debates? * What are neo-liberalism’s core concepts and how have they been interpreted in different national contexts that make it a distinctive ideology? In answering these questions, this book provides a deeper insight into the historical and intellectual origins and conceptual configuration of an ideology that reshaped politics and societies across the world.

Advances in Self-organization and Evolutionary Economics-Jacques Lesouarn 1998 With its general focus on the dynamic processes of a knowledge-based economy, this book will be an invaluable resource for gaining greater understanding of the complexity of real economic systems.
Neo-Colonialism and the Poverty of ‘Development’ in Africa-Mark Langan 2017-10-11 Langan reclaims neo-colonialism as an analytical force for making sense of the failure of ‘development’ strategies in many African states in an era of free market globalisation. Eschewing polemics and critically engaging the work of Ghana’s first President – Kwame Nkrumah – the book offers a rigorous assessment of the concept of neo-colonialism. It then demonstrates how neo-colonialism remains an impediment to genuine empirical sovereignty and poverty reduction in Africa today. It does this through examination of corporate interventions; Western aid-giving; the emergence of ‘new’ donors such as China; EU-Africa trade regimes; the securitisation of development; and the UN Sustainable Development Goals. Throughout the chapters, it becomes clear that the current challenges of African development cannot be solely pinned on so-called neo-patrimonial elites. Instead it becomes imperative to fully acknowledge, and interrogate, corporate and donor interventions which lock many poorer countries into neo-colonial patterns of trade and production. The book provides an original contribution to studies of African political economy, demonstrating the ongoing relevance of the concept of neo-colonialism, and reclaiming it for scholarly analysis in a global era.

Finding Hazardous Asteroids Using Infrared and Visible Wavelength Telescopes-National Academies of Sciences, Engineering, and Medicine 2019-11-09 Near Earth objects (NEOs) have the potential to cause significant damage on Earth. In December 2018, an asteroid exploded in the upper atmosphere over the Bering Sea (western Pacific Ocean) with the explosive force of nearly 10 times that of the Hiroshima bomb. While the frequency of NEO impacts rises in inverse proportion to their sizes, it is still critical to monitor NEO activity in order to prepare defenses for these rare but dangerous threats. Currently, NASA funds a network of ground-based telescopes and a single, soon-to-expire space-based asset to detect and track large asteroids that could cause major damage if they struck Earth. This asset is crucial to NEO tracking as thermal-infrared detection and tracking of asteroids can only be accomplished on a space-based platform. Finding Hazardous Asteroids Using Infrared and Visible Wavelength Telescopes explores the advantages and disadvantages of infrared (IR) technology and visible wavelength observations of NEOs. This report reviews the techniques that could be used to obtain NEO sizes from an infrared spectrum and delineate the associated errors in determining the size. It also evaluates the strengths and weaknesses of these techniques and recommends the most valid techniques that give reproducible results with quantifiable errors.

History of Education-1. A. Coetzter 1989 In this work, which provides an historical perspective on the development of the history of education through the ages, the views of several thinkers on the nature of education are discussed, for example Plato (427-347 BC), Martin Luther (1485-1546) and John Dewey (1859-1952). The establishment and development of the discipline History of Education in South Africa are also dealt with. The authors also discuss various neo-Marxist perspectives on education, and compare the way in which the USA and South Africa have handled the education of the gifted child.

Higher Education and China’s Global Rise-Suyan Pan 2018-06-04 This book examines the rise of China’s global profile in the international higher education community, as indicated by its rise of human capital, visibility in academic publications, world university ranking, expanding international cultural influence, and becoming a study-abroad destination of international students. It identifies the diplomatic role of higher education in China’s politico-economic development over a century, and how the role has been shaped by China’s self-identity as a great power in the world. Higher Education and China’s Global Rise provides an understanding of linkage between higher education and China’s international influence, and a scholarly discussion of what Chinese higher education tells about China’s international relations, especially the aims, means, and nature of China’s rise as a global power. It will help to broaden perspectives surrounding debate about China’s rise that is currently dominated by Western international relations theory and comparative higher education discourses.
